

Content-First Design: Beyond Lorem Ipsum

The Risk

Designing with "perfect" Lorem Ipsum often breaks when real content is added.

Examples:

- Long German compound words break layouts
- User names with special characters
- Empty states (no data to display)
- Very short/long content

Stress Test Your UI

Test Max Length

None

Headline: This is a really long headline that might wrap to three or even four lines depending on the screen size

Does your design handle 3+ line headlines?

Test Min Length

None

Headline: Hi
Body: OK

Does your design look empty with minimal content?

Test Special Characters

None

Name: François O'Brien-Müller
Email: user+test@email-domain.co.uk
Content: "Quotes" & <Tags> [Brackets] {Braces}

Test Internationalization

None

English: Hello (5 chars)

German: Hallo (5 chars)

Japanese: こんにちは (5 chars, but wider visually)

Arabic: مرحبا (right-to-left)

Real Content Patterns

Use Realistic Data

Instead of:

None

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Use:

None

How do I reset my password? I can't remember it.

Content Variables

Content Type	Min	Typical	Max
Blog Title	10 chars	60 chars	120 chars
User Name	2 chars	15 chars	50 chars
Comment	1 word	50 words	500 words
Product Description	50 chars	200 chars	1000 chars

Our Tool Features

Variable Length Generation

None

Short: 1-3 sentences

Medium: 3-5 paragraphs

Long: 10+ paragraphs

Custom: Exact word/character count

Content Types

- Traditional Lorem Ipsum
- Realistic product descriptions
- User comments & reviews
- Technical documentation
- Email content
